RE: Portfolio Analytics Developer Co-op (4-month work term)

Dear Hiring Manager,

I am writing to express my strong interest in the Portfolio Analytics Developer Co-op position at TD Asset Management. As a Second Year Bachelor of Computer Science student at Conestoga College, I am eager to apply my skills in Python, JavaScript (particularly React.js and Redux), and SQL in a dynamic financial environment.

In my current role as a Frontend Developer Volunteer at Communitech, I am actively developing intricate web interfaces using React.js, integrated with Python-based backend systems machine learning algorithms. This ongoing experience is continuously honing my skills in state management using Redux Toolkit and is familiarizing me with handling complex data sets and machine learning algorithms. Additionally, my past internship as a Software Development Intern at Kenja K.K allowed me to collaborate effectively in a team setting and contribute to cloud-based projects, further aligning with the responsibilities outlined for the posted position.

I am particularly drawn to the opportunity to work in the Portfolio Research and Analytics team, where I can contribute to the development of applications that have a tangible impact on asset management. The nature of this role, combining technology and finance, is precisely the kind of challenging and rewarding environment I seek.

I am enthusiastic about the possibilities of joining TD, where I can leverage my technical skills and adaptability. I am particularly impressed by TD's focus on professional growth and inclusivity, which resonates with my own values.

Thank you so much for considering my application. I look forward to the opportunity to discuss how my background, skills, and enthusiasm can be a perfect fit for the Portfolio Analytics Developer Co-op position.

Sincerely,

Hangsihak Sin
